

Dorema Starcamp Dokota Lux

Dorema has created the Starcamp Dakota Lux full caravan awning which is packed full of cleverly designed features which have today's modern camper in mind. This fantastic value for money awning has been produced using the very latest Ten Cate European All Seasons polyester, a heavy duty material which provides excellent longevity and durability.

All of the panels can be completely zipped out which is particularly helpful during set up, making it much easier to thread the awning to the caravan awning rail. Conveniently, each of the side panels feature a door for easy access in and out of the awning and the front panels can also be rolled down to create a veranda effect at the front.

The Dakota Lux features a ventilation opening in the ridge of the front panel which can be closed with a zip panel and there is also a fly screen on the right-hand side panel, ensuring a comfortable temperature can be maintained inside the awning, even in the hotter summer months.

If you require additional space for storage of your camping equipment or just somewhere for your guests to sleep, then a tall annex can be purchased which can be attached to either or both sides of the Dakota Lux awning providing more useable space inside your awning.

Roof material: Coated polyester

Wall material: Ten Cate All Seasons Heavy Quality Coated Polyester
